

Every country has a disposition.

Olam Agri / 195-country atlas / 2026-2051

193 UN members + 2 observer states; territories indexed separately.

203 separate product/unselected units × six worlds × seven milestones = 8,526 rows.

All country financial cases are threshold-only, with unknown economics left blank.

Two pages per country; 18 priority product plans in the linked commercial companion.

34 national driver series; exact source/year and missingness preserved.

Afghanistan

Watch product/corridor opportunity

DECISION REASON

Macro scale warrants a product screen, but no validated category demand, capture or Olam incremental cash supports asset entry yet.

PRODUCT / CUSTOMER

Staple trade, product selection pending / Buyer/supplier segment requires local validation

CURRENT PRESENCE

Not verified, absence not inferred

MODE / CORRIDOR

Watch product/corridor opportunity / Unselected, route evidence required

COMMERCIAL MECHANISM

Customer interviews and delivered-cost comparison before a commercial launch.

NEXT GATE

Confirm product demand, accessible HS line, counterparties, delivered spread, cash conversion and legal clearance.

FEASIBILITY / UNCERTAINTY

Product access, sanctions, rights, tax, competitor, crop/basin and asset economics require local evidence. No legal clearance or investment approval. Country NPV: unknown.

UN medium population projection / million

2026	2030	2035	2040	2045	2050	2051
45.05	50.04	56.65	63.35	70.02	76.89	78.16

Dated WDI country observations

population	43,844,111.00	2025	persons
income ppp	1,964.45	2024	constant PPP dollars/person
urban	25.94	2025	%
inflation	-6.60	2024	% annual
food index	111.43	2022	index 2014–16=100
food import share	26.92	2019	% merchandise imports
food export share	63.85	2019	% merchandise exports
imports usd	3,606,000,000.00	2025	current USD
exports usd	926,000,000.00	2025	current USD

Nutrition and resource transition	121,634	Unknown

Afghanistan / evidence gates

QUALITY / ROLES

31/34 dated national drivers; no customer/asset validation. Potential customer market

PRODUCT DECISION UNITS

AFG-unselected (Unselected product; category evidence required)

DEMAND / SUPPLY / ACCESS

Population is externally projected. Income and supply/trade are national proxies at dated observations, not category demand/capture. Actual customers, rivals and access remain open.

ECONOMICS / SCENARIOS

Six normalized mode-world order roots on dossier1/2; country volumes, margins, capex, taxes, currency, monthly cash and NPV unknown. Generic ranges in C-SENSITIVITY are chosen structural bounds, not country comparables.

COMMON DEPENDENCIES

Origins, shipping choke points, ports, basins, supplier groups, currencies and counterparties must be reconciled across projects. No quantified diversification credit.

INVALIDATION / STOP

A verified product is inaccessible, delivered contribution fails the approved floor, paid repeat disappears, seasonal cash is unfunded or the supplier/asset fails rights and resilience requirements.

OWNER / TIMING

Country/category lead with Finance, Treasury, Supply Chain and Legal. Evidence before capital commitment

INTERNAL EVIDENCE / COST

Reconciled customer orders and delivered unit economics, seasonal NWC, plant/route constraints, basin hazards and applicable taxes. Unquoted; Country/Finance procure a priced data/pilot plan before spend. No zero-cost inference.

Additional dated public drivers / no imputation

PRIORITY COMMERCIAL COMPANION ↗

Priority plans: customer, offer, channel, cash metric and stop gate. Unselected products need a category screen.

Albania

Watch customer specialization

DECISION REASON

UN medium projection shows population decline. Specific convenience, nutrition or industrial segments need measured purchases and unit economics.

PRODUCT / CUSTOMER

Staple trade, product selection pending / Buyer/supplier segment requires local validation

CURRENT PRESENCE

Not verified, absence not inferred

MODE / CORRIDOR

Watch customer specialization / Unselected, route evidence required

COMMERCIAL MECHANISM

Customer interviews and delivered-cost comparison before a commercial launch.

NEXT GATE

Confirm product demand, accessible HS line, counterparties, delivered spread, cash conversion and legal clearance.

FEASIBILITY / UNCERTAINTY

Product access, sanctions, rights, tax, competitor, crop/basin and asset economics require local evidence. No legal clearance or investment approval. Country NPV: unknown.

Antigua and Barbuda / evidence gates

QUALITY / ROLES

27/34 dated national drivers; no customer/asset validation. Potential customer market

PRODUCT DECISION UNITS

ATG-unselected (Unselected product; category evidence required)

DEMAND / SUPPLY / ACCESS

Population is externally projected. Income and supply/trade are national proxies at dated observations, not category demand/capture. Actual customers, rivals and access remain open.

ECONOMICS / SCENARIOS

Six normalized mode-world order roots on dossier1/2; country volumes, margins, capex, taxes, currency, monthly cash and NPV unknown. Generic ranges in C-SENSITIVITY are chosen structural bounds, not country comparables.

COMMON DEPENDENCIES

Origins, shipping choke points, ports, basins, supplier groups, currencies and counterparties must be reconciled across projects. No quantified diversification credit.

INVALIDATION / STOP

A verified product is inaccessible, delivered contribution fails the approved floor, paid repeat disappears, seasonal cash is unfunded or the supplier/asset fails rights and resilience requirements.

OWNER / TIMING

Country/category lead with Finance, Treasury, Supply Chain and Legal. Evidence before capital commitment

INTERNAL EVIDENCE / COST

Reconciled customer orders and delivered unit economics, seasonal NWC, plant/route constraints, basin hazards and applicable taxes. Unquoted; Country/Finance procure a priced data/pilot plan before spend. No zero-cost inference.

Additional dated public drivers / no imputation

PRIORITY COMMERCIAL COMPANION ↗

Priority plans: customer, offer, channel, cash metric and stop gate. Unselected products need a category screen.

Argentina

Watch product/corridor opportunity

DECISION REASON

Macro scale warrants a product screen, but no validated category demand, capture or Olam incremental cash supports asset entry yet.

PRODUCT / CUSTOMER

Staple trade, product selection pending / Buyer/supplier segment requires local validation

CURRENT PRESENCE

Not verified, absence not inferred

MODE / CORRIDOR

Watch product/corridor opportunity / Unselected, route evidence required

COMMERCIAL MECHANISM

Customer interviews and delivered-cost comparison before a commercial launch.

NEXT GATE

Confirm product demand, accessible HS line, counterparties, delivered spread, cash conversion and legal clearance.

FEASIBILITY / UNCERTAINTY

Product access, sanctions, rights, tax, competitor, crop/basin and asset economics require local evidence. No legal clearance or investment approval. Country NPV: unknown.

QUALITY / ROLES

31/34 dated national drivers; no customer/asset validation. Potential customer market

PRODUCT DECISION UNITS

BEL-unselected (Unselected product; category evidence required)

DEMAND / SUPPLY / ACCESS

Population is externally projected. Income and supply/trade are national proxies at dated observations, not category demand/capture. Actual customers, rivals and access remain open.

ECONOMICS / SCENARIOS

Six normalized mode-world order roots on dossier1/2; country volumes, margins, capex, taxes, currency, monthly cash and NPV unknown. Generic ranges in C-SENSITIVITY are chosen structural bounds, not country comparables.

COMMON DEPENDENCIES

Origins, shipping choke points, ports, basins, supplier groups, currencies and counterparties must be reconciled across projects. No quantified diversification credit.

INVALIDATION / STOP

A verified product is inaccessible, delivered contribution fails the approved floor, paid repeat disappears, seasonal cash is unfunded or the supplier/asset fails rights and resilience requirements.

OWNER / TIMING

Country/category lead with Finance, Treasury, Supply Chain and Legal. Evidence before capital commitment

INTERNAL EVIDENCE / COST

Reconciled customer orders and delivered unit economics, seasonal NWC, plant/route constraints, basin hazards and applicable taxes. Unquoted; Country/Finance procure a priced data/pilot plan before spend. No zero-cost inference.

Additional dated public drivers / no imputation

PRIORITY COMMERCIAL COMPANION ↗

Priority plans: customer, offer, channel, cash metric and stop gate. Unselected products need a category screen.

Belize

Watch regional trade

DECISION REASON

Small domestic population suggests a route-based customer screen before standalone capacity. Population alone cannot exclude B2B demand.

PRODUCT / CUSTOMER

Staple trade, product selection pending / Buyer/supplier segment requires local validation

CURRENT PRESENCE

Not verified, absence not inferred

MODE / CORRIDOR

Watch regional trade / Unselected, route evidence required

COMMERCIAL MECHANISM

Customer interviews and delivered-cost comparison before a commercial launch.

NEXT GATE

Confirm product demand, accessible HS line, counterparties, delivered spread, cash conversion and legal clearance.

FEASIBILITY / UNCERTAINTY

Product access, sanctions, rights, tax, competitor, crop/basin and asset economics require local evidence. No legal clearance or investment approval. Country NPV: unknown.

Exact indicators, dates and APIs: country-driver-coverage.csv / source-book. Macro observations do not establish company orders, cash, WACC or access.

PRIORITY COMMERCIAL COMPANION ↗

Priority plans: customer, offer, channel, cash metric and stop gate. Unselected products need a category screen.

Botswana

Watch product/corridor opportunity

DECISION REASON

Macro scale warrants a product screen, but no validated category demand, capture or Olam incremental cash supports asset entry yet.

PRODUCT / CUSTOMER

Staple trade, product selection pending / Buyer/supplier segment requires local validation

CURRENT PRESENCE

Not verified, absence not inferred

MODE / CORRIDOR

Watch product/corridor opportunity / Unselected, route evidence required

COMMERCIAL MECHANISM

Customer interviews and delivered-cost comparison before a commercial launch.

NEXT GATE

Confirm product demand, accessible HS line, counterparties, delivered spread, cash conversion and legal clearance.

FEASIBILITY / UNCERTAINTY

Product access, sanctions, rights, tax, competitor, crop/basin and asset economics require local evidence. No legal clearance or investment approval. Country NPV: unknown.

PRIORITY COMMERCIAL COMPANION ↗

Priority plans: customer, offer, channel, cash metric and stop gate. Unselected products need a category screen.

Brazil

Diligence priority

DECISION REASON

Country page identifies soybean, corn and wheat origination/export. The constraint is route cash, not consumer branding.

PRODUCT / CUSTOMER

Grains and oilseeds / Farmers, cooperatives and B2B importers

CURRENT PRESENCE

Disclosed location in June-2026 factsheet

MODE / CORRIDOR

Origination and corridor trial / Brazil grain/oilseed origins to Asia/Africa

COMMERCIAL MECHANISM

Offer documented specification and delivery economics to contracted buyers.

NEXT GATE

Map common weather, port and financing exposure before claiming diversification.

FEASIBILITY / UNCERTAINTY

Product access, sanctions, rights, tax, competitor, crop/basin and asset economics require local evidence. No legal clearance or investment approval. Country NPV: unknown.

PRIORITY COMMERCIAL COMPANION ↗

Priority plans: customer, offer, channel, cash metric and stop gate. Unselected products need a category screen.

Cabo Verde

Watch regional trade

DECISION REASON

Small domestic population suggests a route-based customer screen before standalone capacity. Population alone cannot exclude B2B demand.

PRODUCT / CUSTOMER

Staple trade, product selection pending / Buyer/supplier segment requires local validation

CURRENT PRESENCE

Not verified, absence not inferred

MODE / CORRIDOR

Watch regional trade / Unselected, route evidence required

COMMERCIAL MECHANISM

Customer interviews and delivered-cost comparison before a commercial launch.

NEXT GATE

Confirm product demand, accessible HS line, counterparties, delivered spread, cash conversion and legal clearance.

FEASIBILITY / UNCERTAINTY

Product access, sanctions, rights, tax, competitor, crop/basin and asset economics require local evidence. No legal clearance or investment approval. Country NPV: unknown.

Congo / evidence gates

QUALITY / ROLES

31/34 dated national drivers; no customer/asset validation. Potential customer market

PRODUCT DECISION UNITS

COG-unselected (Unselected product; category evidence required)

DEMAND / SUPPLY / ACCESS

Population is externally projected. Income and supply/trade are national proxies at dated observations, not category demand/capture. Actual customers, rivals and access remain open.

ECONOMICS / SCENARIOS

Six normalized mode-world order roots on dossier1/2; country volumes, margins, capex, taxes, currency, monthly cash and NPV unknown. Generic ranges in C-SENSITIVITY are chosen structural bounds, not country comparables.

COMMON DEPENDENCIES

Origins, shipping choke points, ports, basins, supplier groups, currencies and counterparties must be reconciled across projects. No quantified diversification credit.

INVALIDATION / STOP

A verified product is inaccessible, delivered contribution fails the approved floor, paid repeat disappears, seasonal cash is unfunded or the supplier/asset fails rights and resilience requirements.

OWNER / TIMING

Country/category lead with Finance, Treasury, Supply Chain and Legal. Evidence before capital commitment

INTERNAL EVIDENCE / COST

Reconciled customer orders and delivered unit economics, seasonal NWC, plant/route constraints, basin hazards and applicable taxes. Unquoted; Country/Finance procure a priced data/pilot plan before spend. No zero-cost inference.

Additional dated public drivers / no imputation

PRIORITY COMMERCIAL COMPANION ↗

Priority plans: customer, offer, channel, cash metric and stop gate. Unselected products need a category screen.

Côte d’Ivoire

Review existing operation

DECISION REASON

Disclosed operating location. Diagnose customer economics and cash before considering additional capital.

PRODUCT / CUSTOMER

Staple trade, product selection pending / Buyer/supplier segment requires local validation

CURRENT PRESENCE

Disclosed location in June-2026 factsheet

MODE / CORRIDOR

Review existing operation / Unselected, route evidence required

COMMERCIAL MECHANISM

Customer interviews and delivered-cost comparison before a commercial launch.

NEXT GATE

Confirm product demand, accessible HS line, counterparties, delivered spread, cash conversion and legal clearance.

FEASIBILITY / UNCERTAINTY

Product access, sanctions, rights, tax, competitor, crop/basin and asset economics require local evidence. No legal clearance or investment approval. Country NPV: unknown.

UN medium population projection / million

Sources: UN_WPP; dated WDI observations; full IDs/pinpoints in source-book and country register. | C-POP-DMA; C-DCF-trade-[world]. Population is externally projected; missing values are not imputed.

Dominica / evidence gates

QUALITY / ROLES

28/34 dated national drivers; no customer/asset validation. Potential customer market

PRODUCT DECISION UNITS

DMA-unselected (Unselected product; category evidence required)

DEMAND / SUPPLY / ACCESS

Population is externally projected. Income and supply/trade are national proxies at dated observations, not category demand/capture. Actual customers, rivals and access remain open.

ECONOMICS / SCENARIOS

Six normalized mode-world order roots on dossier1/2; country volumes, margins, capex, taxes, currency, monthly cash and NPV unknown. Generic ranges in C-SENSITIVITY are chosen structural bounds, not country comparables.

COMMON DEPENDENCIES

Origins, shipping choke points, ports, basins, supplier groups, currencies and counterparties must be reconciled across projects. No quantified diversification credit.

INVALIDATION / STOP

A verified product is inaccessible, delivered contribution fails the approved floor, paid repeat disappears, seasonal cash is unfunded or the supplier/asset fails rights and resilience requirements.

OWNER / TIMING

Country/category lead with Finance, Treasury, Supply Chain and Legal. Evidence before capital commitment

INTERNAL EVIDENCE / COST

Reconciled customer orders and delivered unit economics, seasonal NWC, plant/route constraints, basin hazards and applicable taxes. Unquoted; Country/Finance procure a priced data/pilot plan before spend. No zero-cost inference.

PRIORITY COMMERCIAL COMPANION ↗

Priority plans: customer, offer, channel, cash metric and stop gate. Unselected products need a category screen.

Dominican Republic

Watch product/corridor opportunity

DECISION REASON

Macro scale warrants a product screen, but no validated category demand, capture or Olam incremental cash supports asset entry yet.

PRODUCT / CUSTOMER

Staple trade, product selection pending / Buyer/supplier segment requires local validation

CURRENT PRESENCE

Not verified, absence not inferred

MODE / CORRIDOR

Watch product/corridor opportunity / Unselected, route evidence required

COMMERCIAL MECHANISM

Customer interviews and delivered-cost comparison before a commercial launch.

NEXT GATE

Confirm product demand, accessible HS line, counterparties, delivered spread, cash conversion and legal clearance.

FEASIBILITY / UNCERTAINTY

Product access, sanctions, rights, tax, competitor, crop/basin and asset economics require local evidence. No legal clearance or investment approval. Country NPV: unknown.

PRIORITY COMMERCIAL COMPANION ↗

Priority plans: customer, offer, channel, cash metric and stop gate. Unselected products need a category screen.

Ghana

Diligence priority

DECISION REASON

Existing milling and pasta capability offers a specific customer-performance test.

PRODUCT / CUSTOMER

Flour and pasta / Bakers and food distributors

CURRENT PRESENCE

Disclosed location in June-2026 factsheet

MODE / CORRIDOR

Technical-service and demand pilot / Wheat imports to Ghana milling and customers

COMMERCIAL MECHANISM

Test usable output per flour bag and repeat after introductory support ends.

NEXT GATE

Verify utilization, gross-to-net margin and pasta adoption against substitute meals.

FEASIBILITY / UNCERTAINTY

Product access, sanctions, rights, tax, competitor, crop/basin and asset economics require local evidence. No legal clearance or investment approval. Country NPV: unknown.

Guinea-Bissau

Watch product/corridor opportunity

DECISION REASON

Macro scale warrants a product screen, but no validated category demand, capture or Olam incremental cash supports asset entry yet.

PRODUCT / CUSTOMER

Staple trade, product selection pending / Buyer/supplier segment requires local validation

CURRENT PRESENCE

Not verified, absence not inferred

MODE / CORRIDOR

Watch product/corridor opportunity / Unselected, route evidence required

COMMERCIAL MECHANISM

Customer interviews and delivered-cost comparison before a commercial launch.

NEXT GATE

Confirm product demand, accessible HS line, counterparties, delivered spread, cash conversion and legal clearance.

FEASIBILITY / UNCERTAINTY

Product access, sanctions, rights, tax, competitor, crop/basin and asset economics require local evidence. No legal clearance or investment approval. Country NPV: unknown.

PRIORITY COMMERCIAL COMPANION ↗

Priority plans: customer, offer, channel, cash metric and stop gate. Unselected products need a category screen.

Iceland

Watch regional trade

DECISION REASON

Small domestic population suggests a route-based customer screen before standalone capacity. Population alone cannot exclude B2B demand.

PRODUCT / CUSTOMER

Staple trade, product selection pending / Buyer/supplier segment requires local validation

CURRENT PRESENCE

Not verified, absence not inferred

MODE / CORRIDOR

Watch regional trade / Unselected, route evidence required

COMMERCIAL MECHANISM

Customer interviews and delivered-cost comparison before a commercial launch.

NEXT GATE

Confirm product demand, accessible HS line, counterparties, delivered spread, cash conversion and legal clearance.

FEASIBILITY / UNCERTAINTY

Product access, sanctions, rights, tax, competitor, crop/basin and asset economics require local evidence. No legal clearance or investment approval. Country NPV: unknown.

PRIORITY COMMERCIAL COMPANION ↗

Priority plans: customer, offer, channel, cash metric and stop gate. Unselected products need a category screen.

Liechtenstein

Watch regional trade

DECISION REASON

Small domestic population suggests a route-based customer screen before standalone capacity. Population alone cannot exclude B2B demand.

PRODUCT / CUSTOMER

Staple trade, product selection pending / Buyer/supplier segment requires local validation

CURRENT PRESENCE

Not verified, absence not inferred

MODE / CORRIDOR

Watch regional trade / Unselected, route evidence required

COMMERCIAL MECHANISM

Customer interviews and delivered-cost comparison before a commercial launch.

NEXT GATE

Confirm product demand, accessible HS line, counterparties, delivered spread, cash conversion and legal clearance.

FEASIBILITY / UNCERTAINTY

Product access, sanctions, rights, tax, competitor, crop/basin and asset economics require local evidence. No legal clearance or investment approval. Country NPV: unknown.

PRIORITY COMMERCIAL COMPANION ↗

Priority plans: customer, offer, channel, cash metric and stop gate. Unselected products need a category screen.

Malaysia

Review existing operation

DECISION REASON

Disclosed operating location. Diagnose customer economics and cash before considering additional capital.

PRODUCT / CUSTOMER

Staple trade, product selection pending / Buyer/supplier segment requires local validation

CURRENT PRESENCE

Disclosed location in June-2026 factsheet

MODE / CORRIDOR

Review existing operation / Unselected, route evidence required

COMMERCIAL MECHANISM

Customer interviews and delivered-cost comparison before a commercial launch.

NEXT GATE

Confirm product demand, accessible HS line, counterparties, delivered spread, cash conversion and legal clearance.

FEASIBILITY / UNCERTAINTY

Product access, sanctions, rights, tax, competitor, crop/basin and asset economics require local evidence. No legal clearance or investment approval. Country NPV: unknown.

UN medium population projection / million

Malaysia / evidence gates

QUALITY / ROLES

34/34 dated national drivers; no customer/asset validation. Potential customer market

PRODUCT DECISION UNITS

MYS-unselected (Unselected product; category evidence required)

DEMAND / SUPPLY / ACCESS

Population is externally projected. Income and supply/trade are national proxies at dated observations, not category demand/capture. Actual customers, rivals and access remain open.

ECONOMICS / SCENARIOS

Six normalized mode-world order roots on dossier1/2; country volumes, margins, capex, taxes, currency, monthly cash and NPV unknown. Generic ranges in C-SENSITIVITY are chosen structural bounds, not country comparables.

COMMON DEPENDENCIES

Origins, shipping choke points, ports, basins, supplier groups, currencies and counterparties must be reconciled across projects. No quantified diversification credit.

INVALIDATION / STOP

A verified product is inaccessible, delivered contribution fails the approved floor, paid repeat disappears, seasonal cash is unfunded or the supplier/asset fails rights and resilience requirements.

OWNER / TIMING

Country/category lead with Finance, Treasury, Supply Chain and Legal. Evidence before capital commitment

INTERNAL EVIDENCE / COST

Reconciled customer orders and delivered unit economics, seasonal NWC, plant/route constraints, basin hazards and applicable taxes. Unquoted; Country/Finance procure a priced data/pilot plan before spend. No zero-cost inference.

QUALITY / ROLES

33/34 dated national drivers; no customer/asset validation. Potential customer market

PRODUCT DECISION UNITS

MRT-unselected (Unselected product; category evidence required)

DEMAND / SUPPLY / ACCESS

Population is externally projected. Income and supply/trade are national proxies at dated observations, not category demand/capture. Actual customers, rivals and access remain open.

ECONOMICS / SCENARIOS

Six normalized mode-world order roots on dossier1/2; country volumes, margins, capex, taxes, currency, monthly cash and NPV unknown. Generic ranges in C-SENSITIVITY are chosen structural bounds, not country comparables.

COMMON DEPENDENCIES

Origins, shipping choke points, ports, basins, supplier groups, currencies and counterparties must be reconciled across projects. No quantified diversification credit.

INVALIDATION / STOP

A verified product is inaccessible, delivered contribution fails the approved floor, paid repeat disappears, seasonal cash is unfunded or the supplier/asset fails rights and resilience requirements.

OWNER / TIMING

Country/category lead with Finance, Treasury, Supply Chain and Legal. Evidence before capital commitment

INTERNAL EVIDENCE / COST

Reconciled customer orders and delivered unit economics, seasonal NWC, plant/route constraints, basin hazards and applicable taxes. Unquoted; Country/Finance procure a priced data/pilot plan before spend. No zero-cost inference.

PRIORITY COMMERCIAL COMPANION ↗

Priority plans: customer, offer, channel, cash metric and stop gate. Unselected products need a category screen.

Montenegro

Watch regional trade

DECISION REASON

Small domestic population suggests a route-based customer screen before standalone capacity. Population alone cannot exclude B2B demand.

PRODUCT / CUSTOMER

Staple trade, product selection pending / Buyer/supplier segment requires local validation

CURRENT PRESENCE

Not verified, absence not inferred

MODE / CORRIDOR

Watch regional trade / Unselected, route evidence required

COMMERCIAL MECHANISM

Customer interviews and delivered-cost comparison before a commercial launch.

NEXT GATE

Confirm product demand, accessible HS line, counterparties, delivered spread, cash conversion and legal clearance.

FEASIBILITY / UNCERTAINTY

Product access, sanctions, rights, tax, competitor, crop/basin and asset economics require local evidence. No legal clearance or investment approval. Country NPV: unknown.

PRIORITY COMMERCIAL COMPANION ↗

Priority plans: customer, offer, channel, cash metric and stop gate. Unselected products need a category screen.

Nigeria

Diligence priority

DECISION REASON

Nigeria already offers milling, oil refining and national logistics. Learning cost can precede further assets.

PRODUCT / CUSTOMER

Semolina and edible oils / Households and distributors

CURRENT PRESENCE

Disclosed location in June-2026 factsheet

MODE / CORRIDOR

Controlled brownfield commercial pilot / Imported wheat/crude oil to Nigerian routes

COMMERCIAL MECHANISM

Measure cash ticket, meal economics, repeat and route availability. Keep the categories separate.

NEXT GATE

Finance-approved eligible sell-through and route P&L. Legal rechecks crude/refined HS access.

FEASIBILITY / UNCERTAINTY

Product access, sanctions, rights, tax, competitor, crop/basin and asset economics require local evidence. No legal clearance or investment approval. Country NPV: unknown.

UN medium population projection / million

2026	2030	2035	2040	2045	2050	2051

Nigeria / evidence gates

QUALITY / ROLES

33/34 dated national drivers; no customer/asset validation. Customer and processing market

PRODUCT DECISION UNITS

NGA-semolina (Semolina), NGA-edible_oil (Edible oil)

DEMAND / SUPPLY / ACCESS

Population is externally projected. Income and supply/trade are national proxies at dated observations, not category demand/capture. Actual customers, rivals and access remain open.

ECONOMICS / SCENARIOS

Six normalized mode-world order roots on dossier1/2; country volumes, margins, capex, taxes, currency, monthly cash and NPV unknown. Generic ranges in C-SENSITIVITY are chosen structural bounds, not country comparables.

COMMON DEPENDENCIES

Origins, shipping choke points, ports, basins, supplier groups, currencies and counterparties must be reconciled across projects. No quantified diversification credit.

INVALIDATION / STOP

A verified product is inaccessible, delivered contribution fails the approved floor, paid repeat disappears, seasonal cash is unfunded or the supplier/asset fails rights and resilience requirements.

OWNER / TIMING

Country/category lead with Finance, Treasury, Supply Chain and Legal. Evidence before capital commitment

INTERNAL EVIDENCE / COST

Reconciled customer orders and delivered unit economics, seasonal NWC, plant/route constraints, basin hazards and applicable taxes. Unquoted; Country/Finance procure a priced data/pilot plan before spend. No zero-cost inference.

PRIORITY COMMERCIAL COMPANION ↗

Priority plans: customer, offer, channel, cash metric and stop gate. Unselected products need a category screen.

Poland

Watch customer specialization

DECISION REASON

UN medium projection shows population decline. Specific convenience, nutrition or industrial segments need measured purchases and unit economics.

PRODUCT / CUSTOMER

Staple trade, product selection pending / Buyer/supplier segment requires local validation

CURRENT PRESENCE

Not verified, absence not inferred

MODE / CORRIDOR

Watch customer specialization / Unselected, route evidence required

COMMERCIAL MECHANISM

Customer interviews and delivered-cost comparison before a commercial launch.

NEXT GATE

Confirm product demand, accessible HS line, counterparties, delivered spread, cash conversion and legal clearance.

FEASIBILITY / UNCERTAINTY

Product access, sanctions, rights, tax, competitor, crop/basin and asset economics require local evidence. No legal clearance or investment approval. Country NPV: unknown.

Romania / evidence gates

QUALITY / ROLES

33/34 dated national drivers; no customer/asset validation. Potential customer market

PRODUCT DECISION UNITS

ROU-unselected (Unselected product; category evidence required)

DEMAND / SUPPLY / ACCESS

Population is externally projected. Income and supply/trade are national proxies at dated observations, not category demand/capture. Actual customers, rivals and access remain open.

ECONOMICS / SCENARIOS

Six normalized mode-world order roots on dossier1/2; country volumes, margins, capex, taxes, currency, monthly cash and NPV unknown. Generic ranges in C-SENSITIVITY are chosen structural bounds, not country comparables.

COMMON DEPENDENCIES

Origins, shipping choke points, ports, basins, supplier groups, currencies and counterparties must be reconciled across projects. No quantified diversification credit.

INVALIDATION / STOP

A verified product is inaccessible, delivered contribution fails the approved floor, paid repeat disappears, seasonal cash is unfunded or the supplier/asset fails rights and resilience requirements.

OWNER / TIMING

Country/category lead with Finance, Treasury, Supply Chain and Legal. Evidence before capital commitment

INTERNAL EVIDENCE / COST

Reconciled customer orders and delivered unit economics, seasonal NWC, plant/route constraints, basin hazards and applicable taxes. Unquoted; Country/Finance procure a priced data/pilot plan before spend. No zero-cost inference.

PRIORITY COMMERCIAL COMPANION ↗

Priority plans: customer, offer, channel, cash metric and stop gate. Unselected products need a category screen.

Russian Federation

Review existing operation

DECISION REASON

Disclosed operating location. Diagnose customer economics and cash before considering additional capital.

PRODUCT / CUSTOMER

Staple trade, product selection pending / Buyer/supplier segment requires local validation

CURRENT PRESENCE

Disclosed location in June-2026 factsheet

MODE / CORRIDOR

Review existing operation / Unselected, route evidence required

COMMERCIAL MECHANISM

Customer interviews and delivered-cost comparison before a commercial launch.

NEXT GATE

Confirm product demand, accessible HS line, counterparties, delivered spread, cash conversion and legal clearance.

FEASIBILITY / UNCERTAINTY

Product access, sanctions, rights, tax, competitor, crop/basin and asset economics require local evidence. No legal clearance or investment approval. Country NPV: unknown.

PRIORITY COMMERCIAL COMPANION ↗

Priority plans: customer, offer, channel, cash metric and stop gate. Unselected products need a category screen.

Samoa

Watch regional trade

DECISION REASON

Small domestic population suggests a route-based customer screen before standalone capacity. Population alone cannot exclude B2B demand.

PRODUCT / CUSTOMER

Staple trade, product selection pending / Buyer/supplier segment requires local validation

CURRENT PRESENCE

Not verified, absence not inferred

MODE / CORRIDOR

Watch regional trade / Unselected, route evidence required

COMMERCIAL MECHANISM

Customer interviews and delivered-cost comparison before a commercial launch.

NEXT GATE

Confirm product demand, accessible HS line, counterparties, delivered spread, cash conversion and legal clearance.

FEASIBILITY / UNCERTAINTY

Product access, sanctions, rights, tax, competitor, crop/basin and asset economics require local evidence. No legal clearance or investment approval. Country NPV: unknown.

Serbia / evidence gates

QUALITY / ROLES

33/34 dated national drivers; no customer/asset validation. Potential customer market

PRODUCT DECISION UNITS

SRB-unselected (Unselected product; category evidence required)

DEMAND / SUPPLY / ACCESS

Population is externally projected. Income and supply/trade are national proxies at dated observations, not category demand/capture. Actual customers, rivals and access remain open.

ECONOMICS / SCENARIOS

Six normalized mode-world order roots on dossier1/2; country volumes, margins, capex, taxes, currency, monthly cash and NPV unknown. Generic ranges in C-SENSITIVITY are chosen structural bounds, not country comparables.

COMMON DEPENDENCIES

Origins, shipping choke points, ports, basins, supplier groups, currencies and counterparties must be reconciled across projects. No quantified diversification credit.

INVALIDATION / STOP

A verified product is inaccessible, delivered contribution fails the approved floor, paid repeat disappears, seasonal cash is unfunded or the supplier/asset fails rights and resilience requirements.

OWNER / TIMING

Country/category lead with Finance, Treasury, Supply Chain and Legal. Evidence before capital commitment

INTERNAL EVIDENCE / COST

Reconciled customer orders and delivered unit economics, seasonal NWC, plant/route constraints, basin hazards and applicable taxes. Unquoted; Country/Finance procure a priced data/pilot plan before spend. No zero-cost inference.

PRIORITY COMMERCIAL COMPANION ↗

Priority plans: customer, offer, channel, cash metric and stop gate. Unselected products need a category screen.

Seychelles

Watch regional trade

DECISION REASON

Small domestic population suggests a route-based customer screen before standalone capacity. Population alone cannot exclude B2B demand.

PRODUCT / CUSTOMER

Staple trade, product selection pending / Buyer/supplier segment requires local validation

CURRENT PRESENCE

Not verified, absence not inferred

MODE / CORRIDOR

Watch regional trade / Unselected, route evidence required

COMMERCIAL MECHANISM

Customer interviews and delivered-cost comparison before a commercial launch.

NEXT GATE

Confirm product demand, accessible HS line, counterparties, delivered spread, cash conversion and legal clearance.

FEASIBILITY / UNCERTAINTY

Product access, sanctions, rights, tax, competitor, crop/basin and asset economics require local evidence. No legal clearance or investment approval. Country NPV: unknown.

PRIORITY COMMERCIAL COMPANION ↗

Priority plans: customer, offer, channel, cash metric and stop gate. Unselected products need a category screen.

Solomon Islands

Watch regional trade

DECISION REASON

Small domestic population suggests a route-based customer screen before standalone capacity. Population alone cannot exclude B2B demand.

PRODUCT / CUSTOMER

Staple trade, product selection pending / Buyer/supplier segment requires local validation

CURRENT PRESENCE

Not verified, absence not inferred

MODE / CORRIDOR

Watch regional trade / Unselected, route evidence required

COMMERCIAL MECHANISM

Customer interviews and delivered-cost comparison before a commercial launch.

NEXT GATE

Confirm product demand, accessible HS line, counterparties, delivered spread, cash conversion and legal clearance.

FEASIBILITY / UNCERTAINTY

Product access, sanctions, rights, tax, competitor, crop/basin and asset economics require local evidence. No legal clearance or investment approval. Country NPV: unknown.

UN medium population projection / million

PRIORITY COMMERCIAL COMPANION ↗

Priority plans: customer, offer, channel, cash metric and stop gate. Unselected products need a category screen.

Syrian Arab Republic

Watch product/corridor opportunity

DECISION REASON

Macro scale warrants a product screen, but no validated category demand, capture or Olam incremental cash supports asset entry yet.

PRODUCT / CUSTOMER

Staple trade, product selection pending / Buyer/supplier segment requires local validation

CURRENT PRESENCE

Not verified, absence not inferred

MODE / CORRIDOR

Watch product/corridor opportunity / Unselected, route evidence required

COMMERCIAL MECHANISM

Customer interviews and delivered-cost comparison before a commercial launch.

NEXT GATE

Confirm product demand, accessible HS line, counterparties, delivered spread, cash conversion and legal clearance.

FEASIBILITY / UNCERTAINTY

Product access, sanctions, rights, tax, competitor, crop/basin and asset economics require local evidence. No legal clearance or investment approval. Country NPV: unknown.

Tonga / evidence gates

QUALITY / ROLES

28/34 dated national drivers; no customer/asset validation. Potential customer market

PRODUCT DECISION UNITS

TON-unselected (Unselected product; category evidence required)

DEMAND / SUPPLY / ACCESS

Population is externally projected. Income and supply/trade are national proxies at dated observations, not category demand/capture. Actual customers, rivals and access remain open.

ECONOMICS / SCENARIOS

Six normalized mode-world order roots on dossier1/2; country volumes, margins, capex, taxes, currency, monthly cash and NPV unknown. Generic ranges in C-SENSITIVITY are chosen structural bounds, not country comparables.

COMMON DEPENDENCIES

Origins, shipping choke points, ports, basins, supplier groups, currencies and counterparties must be reconciled across projects. No quantified diversification credit.

INVALIDATION / STOP

A verified product is inaccessible, delivered contribution fails the approved floor, paid repeat disappears, seasonal cash is unfunded or the supplier/asset fails rights and resilience requirements.

OWNER / TIMING

Country/category lead with Finance, Treasury, Supply Chain and Legal. Evidence before capital commitment

INTERNAL EVIDENCE / COST

Reconciled customer orders and delivered unit economics, seasonal NWC, plant/route constraints, basin hazards and applicable taxes. Unquoted; Country/Finance procure a priced data/pilot plan before spend. No zero-cost inference.

Additional dated public drivers / no imputation

Exact indicators, dates and APIs: country-driver-coverage.csv / source-book. Macro observations do not establish company orders, cash, WACC or access.

PRIORITY COMMERCIAL COMPANION ↗

Priority plans: customer, offer, channel, cash metric and stop gate. Unselected products need a category screen.

Trinidad and Tobago

Watch customer specialization

DECISION REASON

UN medium projection shows population decline. Specific convenience, nutrition or industrial segments need measured purchases and unit economics.

PRODUCT / CUSTOMER

Staple trade, product selection pending / Buyer/supplier segment requires local validation

CURRENT PRESENCE

Not verified, absence not inferred

MODE / CORRIDOR

Watch customer specialization / Unselected, route evidence required

COMMERCIAL MECHANISM

Customer interviews and delivered-cost comparison before a commercial launch.

NEXT GATE

Confirm product demand, accessible HS line, counterparties, delivered spread, cash conversion and legal clearance.

FEASIBILITY / UNCERTAINTY

Product access, sanctions, rights, tax, competitor, crop/basin and asset economics require local evidence. No legal clearance or investment approval. Country NPV: unknown.

Six normalized mode-world order roots on dossier1/2; country volumes, margins, capex, taxes, currency, monthly cash and NPV unknown. Generic ranges in C-SENSITIVITY are chosen structural bounds, not country comparables.

COMMON DEPENDENCIES

Origins, shipping choke points, ports, basins, supplier groups, currencies and counterparties must be reconciled across projects. No quantified diversification credit.

INVALIDATION / STOP

A verified product is inaccessible, delivered contribution fails the approved floor, paid repeat disappears, seasonal cash is unfunded or the supplier/asset fails rights and resilience requirements.

OWNER / TIMING

Country/category lead with Finance, Treasury, Supply Chain and Legal. Evidence before capital commitment

INTERNAL EVIDENCE / COST

Reconciled customer orders and delivered unit economics, seasonal NWC, plant/route constraints, basin hazards and applicable taxes. Unquoted; Country/Finance procure a priced data/pilot plan before spend. No zero-cost inference.

PRIORITY COMMERCIAL COMPANION ↗

Priority plans: customer, offer, channel, cash metric and stop gate. Unselected products need a category screen.

Yemen

Watch product/corridor opportunity

DECISION REASON

Macro scale warrants a product screen, but no validated category demand, capture or Olam incremental cash supports asset entry yet.

PRODUCT / CUSTOMER

Staple trade, product selection pending / Buyer/supplier segment requires local validation

CURRENT PRESENCE

Not verified, absence not inferred

MODE / CORRIDOR

Watch product/corridor opportunity / Unselected, route evidence required

COMMERCIAL MECHANISM

Customer interviews and delivered-cost comparison before a commercial launch.

NEXT GATE

Confirm product demand, accessible HS line, counterparties, delivered spread, cash conversion and legal clearance.

FEASIBILITY / UNCERTAINTY

Product access, sanctions, rights, tax, competitor, crop/basin and asset economics require local evidence. No legal clearance or investment approval. Country NPV: unknown.
