Build qualified US pipeline before buying lead volume.

The 12-month system: account fit → workflow proof → sales-accepted opportunities.

THE INITIAL WEDGE

3–10 interconnected dry-cleaning stores, one decision-making parent account.

Sell an operations walkthrough: fragmented branch reporting, plant handoffs, order visibility, pickup reliability and switching risk.

One acquired chain ≠ five acquired customer logos.

3–30	source market definition
₹2,700	observed raw lead cost
₹10 lakh	marketing cap / 12 months

₹10,00,000 / ₹2,700 ≈ 370 RAW leads if all cash bought Meta leads. This is not CAC or customers.

Start with operationally linked 3–10-store groups.

Keep 11–30-store deals selectively; validate buyers and US implementation viability.

PRIMARY / 3–10 STORES

Owner-led chain with common production or fragmented revenue/order reports; named economic buyer and an active operations issue.

SECONDARY / 11–30 STORES

Potentially higher value and longer procurement, migration complexity or stakeholder consensus. Keep a capped test lane.

OBSERVABLE ACCOUNT SCORE / uncalibrated starting weights

Locations	20 pts
Operating complexity	20 pts
Workflow pain	20 pts
Urgent trigger	15 pts
Economic buyer	10 pts
US migration/payment readiness	10 pts
Territory + technical fit	5 pts

75+ contact · 50–74 nurture · <50 exclude

Dallas–Fort Worth & Atlanta = test candidates only; verify 100 parent accounts per cluster before ranking.

Position on one operating picture across every store.

The operational problem precedes any AI capability; prove live workflows before advertising.

“Run every store, order and pickup as one operation—without losing control as you expand.”

DEMAND ASSET	CTA / MEASUREMENT
01 5-Store Profit Leakage Calculator	Custom assessment / verified ICP SQLs
02 The Multi-Store Morning Dashboard	Branch scorecard walkthrough / held→SQL
03 POS Migration: Tags, Payments & People	Feasibility review / objections cleared
04 One Customer, Five Stores: Broken Order Status	Order-flow audit / pain-qualified calls
05 Responsible Repeat-Customer Win-Back	Retention workflow / influenced pipeline

ILLUSTRATIVE LABOR CAPACITY: 5 stores × 0.5h/day × 26 days × $18/h = $1,170/month; not verified cash savings.

Rank channels on accepted pipeline—not cheaper leads.

Commercial intent, named accounts and referral trust beat broad reach until source cohorts mature.

CHANNEL	ADVANTAGE	PRIMARY RISK	SUCCESS METRIC
01 **Intent Search (exact/phrase)**	Software-buying intent	Sparse / noisy queries	Cost per accepted SQL
02 **Verified-account outbound**	Exact 3–10-store account fit	Manual labor + sales load	Held ICP meetings
03 **Industry partners**	Warm operational credibility	Partner access unproven	Partner-sourced SQL
04 **Meta proof retargeting**	Reassure evaluators	Small audiences / poor ICP	Incremental qualified holds
05 **Decision-enabling assets**	Resolve buying objections	Traffic without intent	Assisted SQL / usage

STOP obvious irrelevant searches immediately. SCALE only with verified fit, relevant conversations and stage-mature economics.

Test a ₹30k multi-store operations audit in month one.

A learning experiment: sales-accepted conversations, not a statistically credible win forecast.

DRAFT SEARCH AD

Dry Cleaner POS for Multi-Store Teams
See Every Store in One View
Managing 3+ dry-cleaning stores? Review orders, reporting and pickups in a workflow-specific demo.

CTA: Book a 20-Minute Multi-Store Audit.

MODELED FUNNEL / ASSUMPTIONS ONLY

₹30k ÷ ₹200 CPC	150 clicks
150 × 6% lead CVR	9 raw leads
9 × 40% fit	3.6 expected fit
3.6 × 60% booking	2.16 bookings
2.16 × 75% show	1.62 held
1.62 × 50% accepted	**0.81 expected SQL**

SEARCH THEMES [multi location dry cleaning software] · “dry cleaning pos software” · “dry cleaning franchise software”

NEGATIVES jobs / near me / equipment / coin-operated / salary / laundromat / consumer pickup

90 days: baseline truth → qualified demand → repeatability.

Weekly marketing–sales–product decisions define when to hold, reallocate or scale.

DAYS 01–30

ESTABLISH TRUTH

- Audit 90 days of Meta cohorts
- Verify US price, payments, support, integrations
- Interview 10–12 operators
- Build 200 verified account records
- Launch one page, two proof assets, microtest

Output: source baseline, messaging, held-call evidence

Gate: missing US readiness → pause ads

DAYS 31–60

COMPARE SIGNAL

- Score then contact real parent accounts
- Test pain-first vs ROI-first
- Trial only confirmed partner access
- Coach speed-to-lead and no-show recovery
- Rank sources by accepted opportunities

Output: qualified conversations, first source ranking

Gate: low-fit meetings → revise ICP

DAYS 61–90

SCALE OR REPAIR

- Evaluate SQL/pilot close risk
- Package sales + migration objection playbook
- Track live locations, not only wins
- Fully load source CAC including sales time
- Submit quarter-two budget recommendation

Output: board-ready scale/pause decision

Gate: implementation risk → fix first

Budget learning before buying scale.

Annual ₹10,00,000 ceiling; the ₹1,00,000 60-day case is an alternative, not additional.

12 MONTHS / ₹10 LAKH

Intent Search	₹350k	35%
Verified-account outreach	₹180k	18%
Partner referrals	₹120k	12%
Landing / product-proof assets	₹120k	12%
Meta retargeting / ICP test	₹90k	9%
CRM / tracking	₹60k	6%
Uncommitted reserve	₹80k	8%

TOTAL ₹10,00,000 · 100%

ONLY ₹1L / 60 DAYS

Search pilot	₹30k
Account research + outreach	₹30k
Landing + proof	₹15k
Tracking + follow-up	₹10k
Partner pilot	₹5k
Withheld reserve	₹10k

TOTAL ₹1,00,000 · 100%

The same ₹2,700 lead can imply ₹54k–₹270k CAC.

Sensitivity at ASSUMED conversion rates exposes where economics can break.

LEAD→WON (ASSUMED)	MEDIA-ONLY CAC	
1%	₹2,70,000	over cap
3%	₹90,000	cap used
5%	₹54,000	₹36k headroom

MODEL PAYBACK LIMIT

₹20,000 / month / chain

× 75% contribution margin

× 6 months cap = ₹90,000

PARENT-ACCOUNT STAGES + OWNER

Spend → qualified parent → booked → held → accepted SQL → trial/pilot → paying group → locations activated → retained contribution

Daily: quality + SLA · Weekly: meetings and SQL · Monthly: mature deals, full CAC, cash payback

Three facts would let me start building pipeline next Monday.

Thank you. I would rather discover what fails early than spend the budget proving reach.

01	**90-day source-level CRM cohort**	How many real 3–30-site companies became held demos, accepted SQLs and paying groups?
02	**US production-readiness walkthrough**	What payments, data import, plant workflows, software plan and US support can we actually demonstrate?
03	**A named sales owner + weekly scorecard**	Who takes US buyer conversations, documents win/loss causes and authorizes the next cash tranche?

REMOTE OPERATING PROMISE: US time overlap + shared CRM stages + documented SLAs + co-owned operator demos.
