HYDERABAD

Political dynamics,
governance & public
value

Manash Protim Deori | Inclusive Minds

Research cut-off 9 October 2026 · Historical data retain reference dates

Hyderabad's political, institutional and service records demand separate analytical lenses

The geography of institutions, the meaning of election results, and the distance from budget provision to service delivery must be kept distinct.

ELECTIONS INC 64 / 119 Assembly seats statewide in 2023; no urban-wide inference.	JURISDICTIONS GO 55 (11 Feb 2026): GHMC, Cyberabad and Malkajgiri corporations.	DELIVERY 2026-27 provisions are budget estimates, not confirmed outcomes.
---	---	---

ECI 2023 statewide outcome; 2026 governance order and estimates. No citywide electoral or service-effect inference.

Hyderabad's electoral, municipal and planning units are not interchangeable

GO 55 establishes three municipal corporations; Assembly constituencies, parliamentary seats and planning jurisdictions use different boundaries.

2026 municipal

GHMC · Cyberabad MC · Malkajgiri MC

Election geography

Assembly and parliamentary units differ

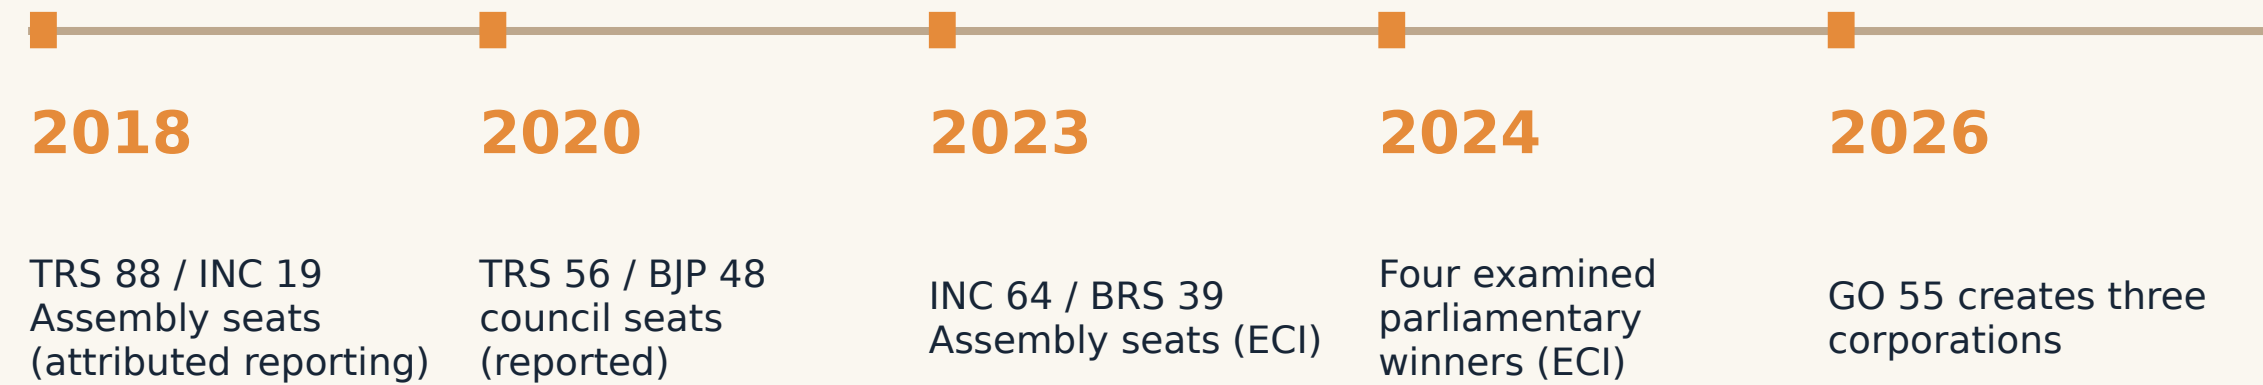

Planning geography

HMR / FCDA records have separate legal bases

Schematic categories, not GIS boundary polygons. Full legal crosswalk must be validated before geographic joins.

Different election and administrative milestones explain today's institutional context

A chronological view distinguishes election types, government transitions and administrative reforms.

2018 and 2020 results are attributed historical reporting; different ballots and institutional periods are not vote swing.

Urban services involve multiple accountable institutions

Municipal geography, asset protection, river planning and budget financing involve distinct decision-makers.

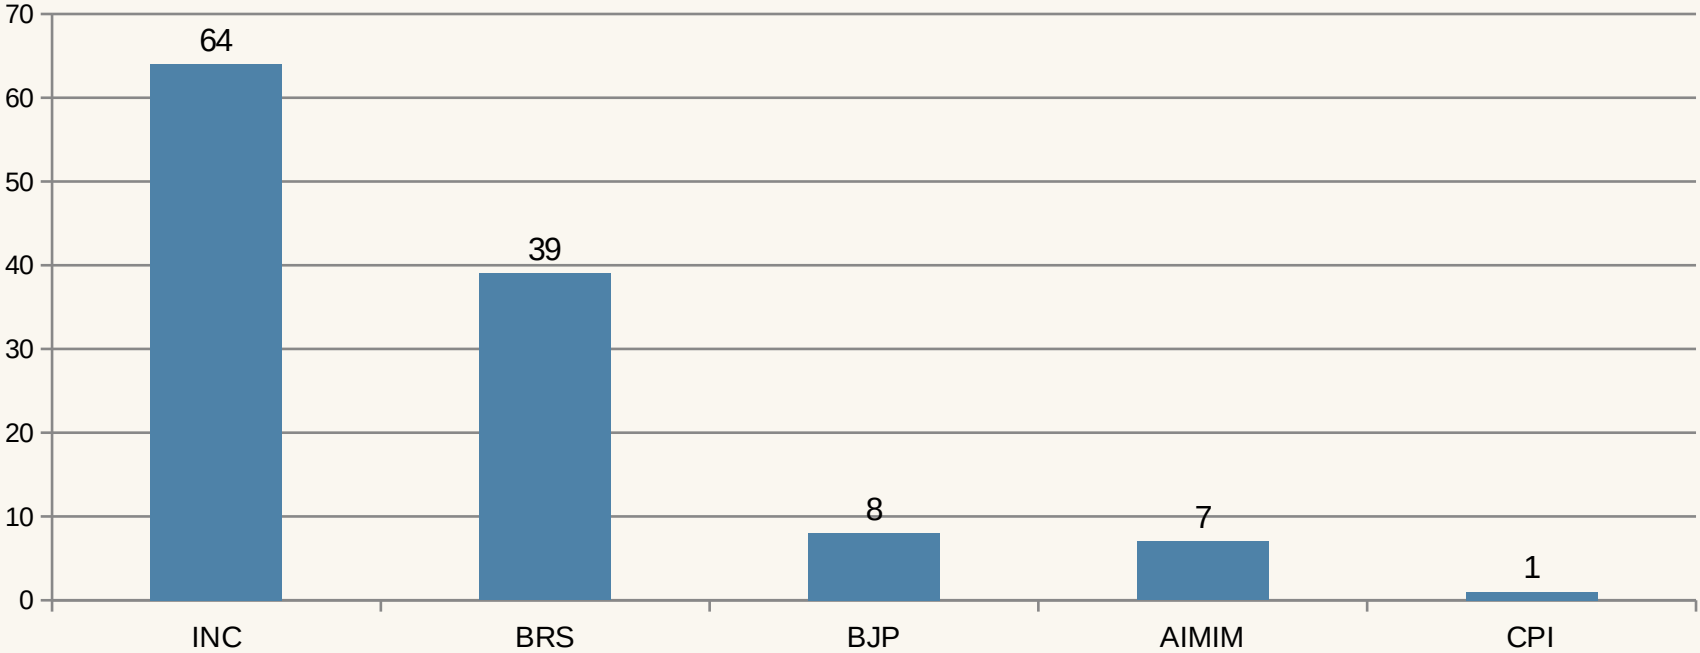

INSTITUTION / UNIT	RECORD	SCOPE
Municipal	GHMC / CMC / MMC	GO 55
Protection	HYDRAA / MAUD	Agency remit
River	MRDCL	Published vision
Finance	State / programme bodies	Budget estimates

Agency scope is not proof of effectiveness or case-specific legal authority.

INC won 64 of 119 seats in Telangana's 2023 Assembly election

The official ECI tally records 64 INC, 39 BRS, 8 BJP, 7 AIMIM and 1 CPI seat in 2023.

ECI | Telangana
Assembly seats won,
2023

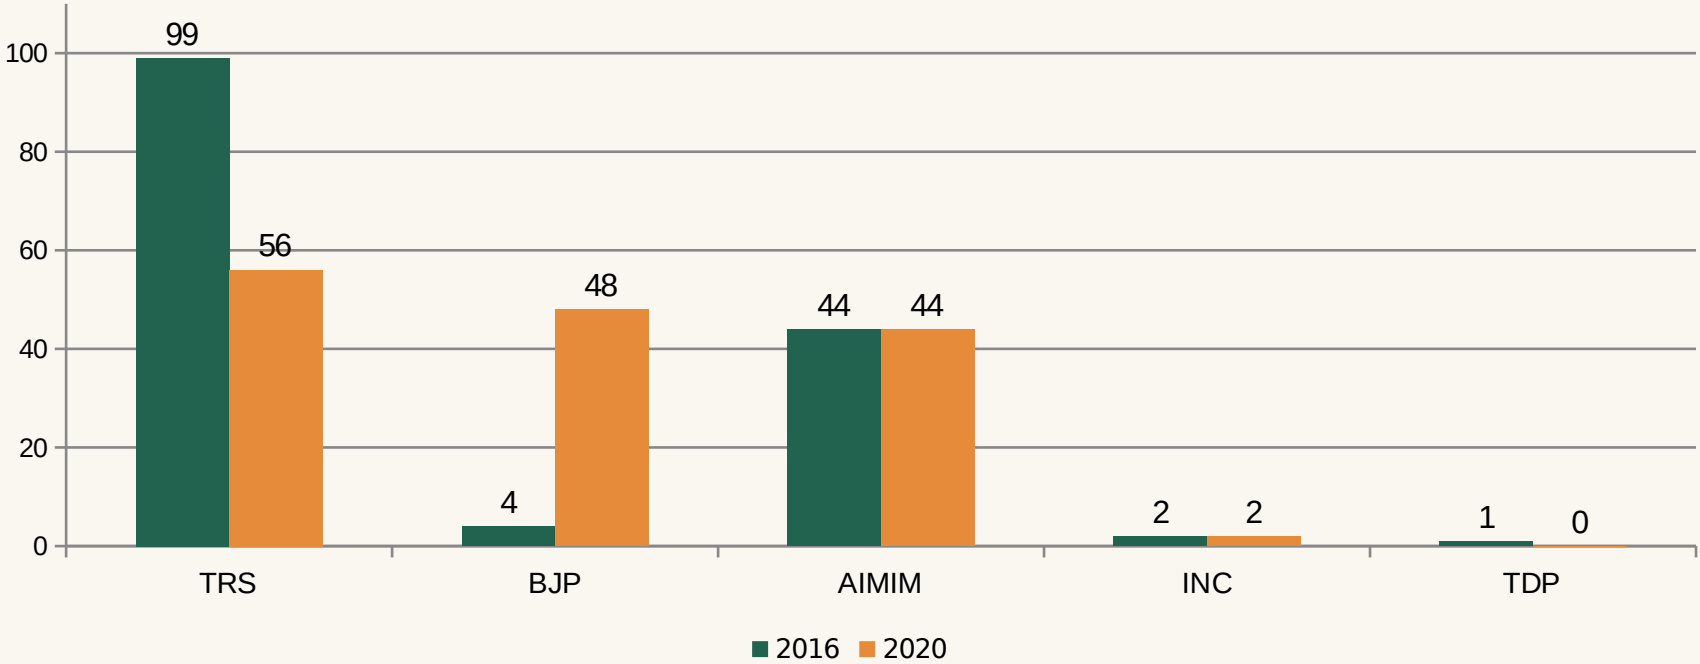

119 statewide seats. This is not Hyderabad-specific voting or any party's current legislative strength.

Reported GHMC council composition changed between 2016 and 2020

Published historical recaps report a changed composition of the 150-seat GHMC council; these are seat counts, not vote transfers.

Reported GHMC seats won · historical 150-seat councils

Reported 2016 and 2020 council results; not 2026 corporation composition. Original primary municipal declarations should be checked.

Four relevant 2024 parliamentary seats had distinct, documented winners

ECI's 2024 Lok Sabha records identify BJP winners in Malkajgiri, Secunderabad and Chevella, and the AIMIM winner in Hyderabad.

INSTITUTION / UNIT	RECORD	SCOPE
Malkajgiri	Eatala Rajender	BJP
Secunderabad	G. Kishan Reddy	BJP
Hyderabad	Asaduddin Owaisi	AIMIM
Chevella	Konda Vishweshwar Reddy	BJP

Four distinct parliamentary constituencies, not an aggregate of Hyderabad Assembly seats.

Identified industrial clusters do not measure citywide economic benefit

The investment portal identifies Genome Valley and electronics-sector clusters, but this alone cannot establish Hyderabad-wide jobs, GDP or access.

Production

Which employers and value chains are documented?

Access

Who can reach jobs, training and services?

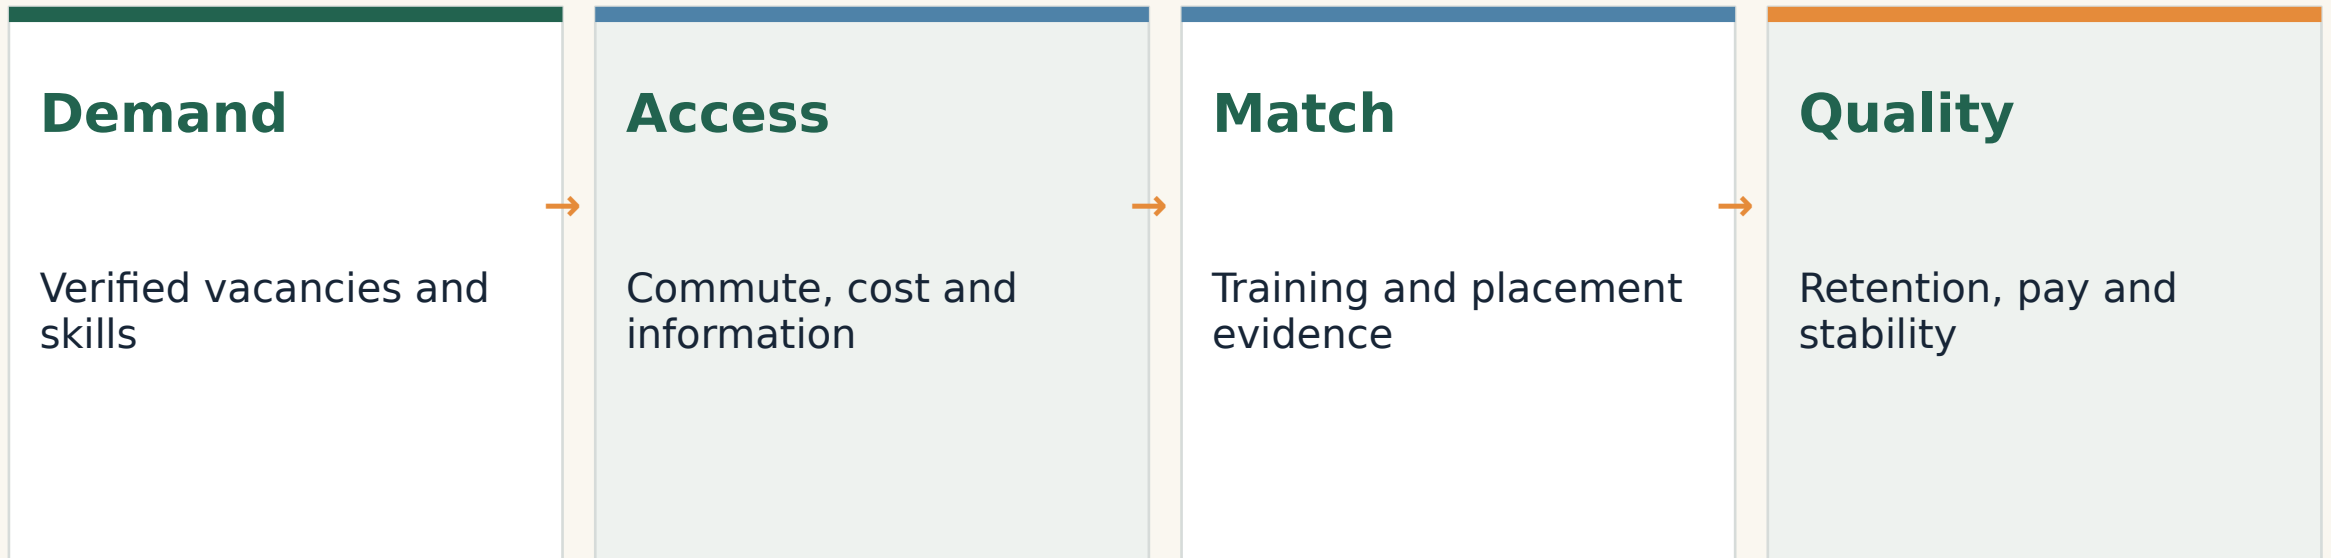

Distribution

What evidence shows benefits across places?

State investment-portal evidence establishes identified clusters, not realised jobs or citywide economic impact.

Employment access requires evidence beyond sector growth narratives

Vacancy, skill, commute, placement and job-quality data are needed before judging the reach of economic opportunity.

Measurement framework, not a finding about household employment outcomes.

Municipal reorganisation and planning changes demand updated land and housing evidence

GO 55 and the official GO 68/69 index define differing urban and planning units; parcel- and housing-level conclusions need further evidence.

Boundary Which instrument and vintage?	Rights Which title, approval and record?	Access Which housing and service evidence?
--	--	--

No verified current price index, housing-displacement total or parcel-specific legal finding.

Metro funding provisions are not proof of completed service expansion

The 2026–27 state budget records ₹600 crore for Metro Phase II and ₹500 crore as loans to HMRL; neither represents proven completion.

₹600 cr

Metro Rail Phase II ·BE

₹500 cr

Loans to HMRL ·BE

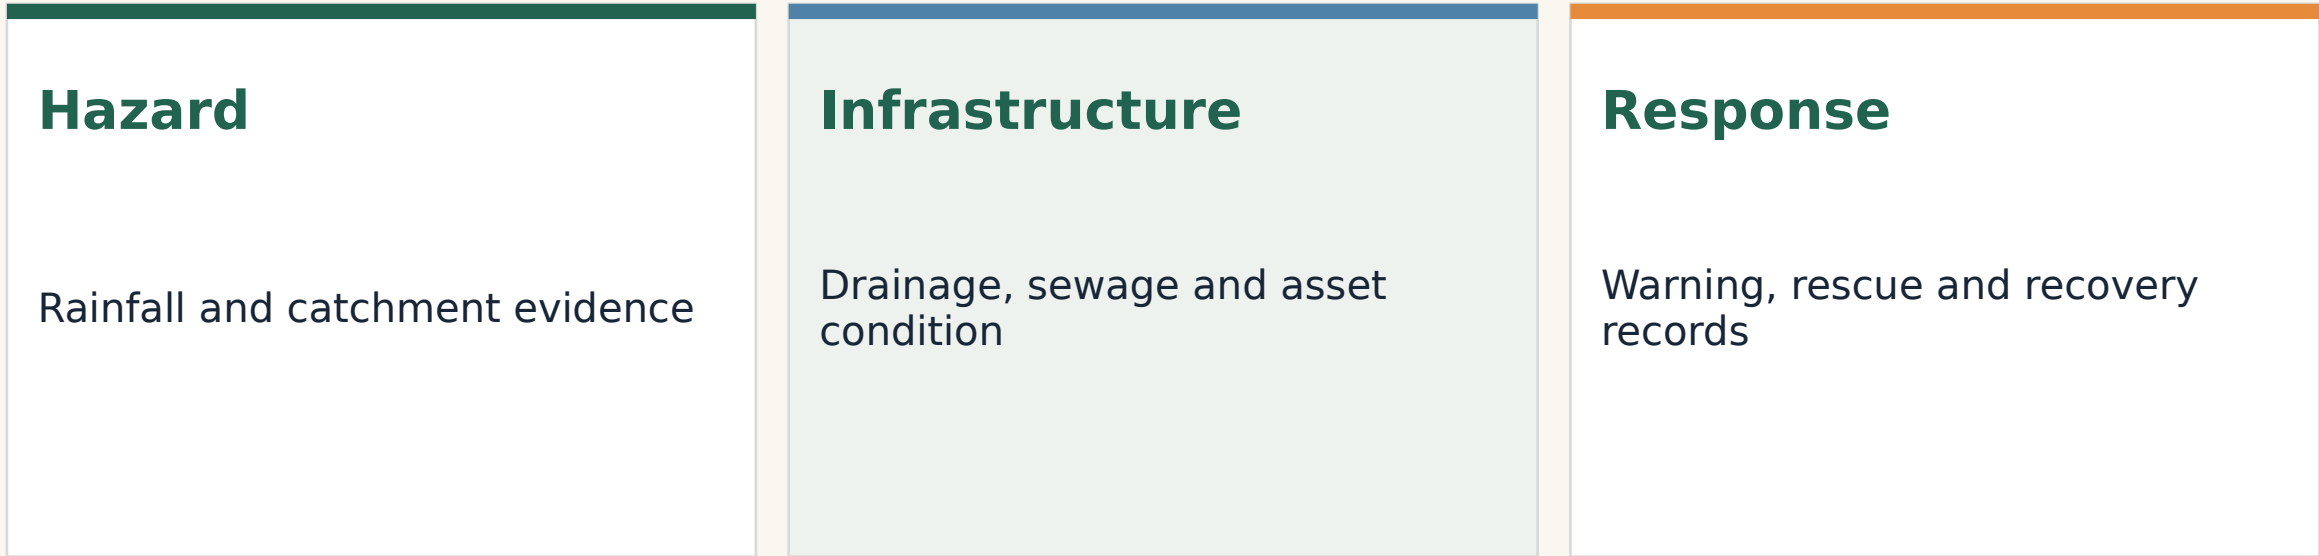

Journey access

A separate validation question

2026–27 budget estimates; separate provision lines, not evidence of operating service.

A credible resilience assessment must connect hazards, assets and service outcomes

HYDRAA's described disaster remit and MRDCL's ecological objectives establish institutional roles—not verified flood or water-quality outcomes.

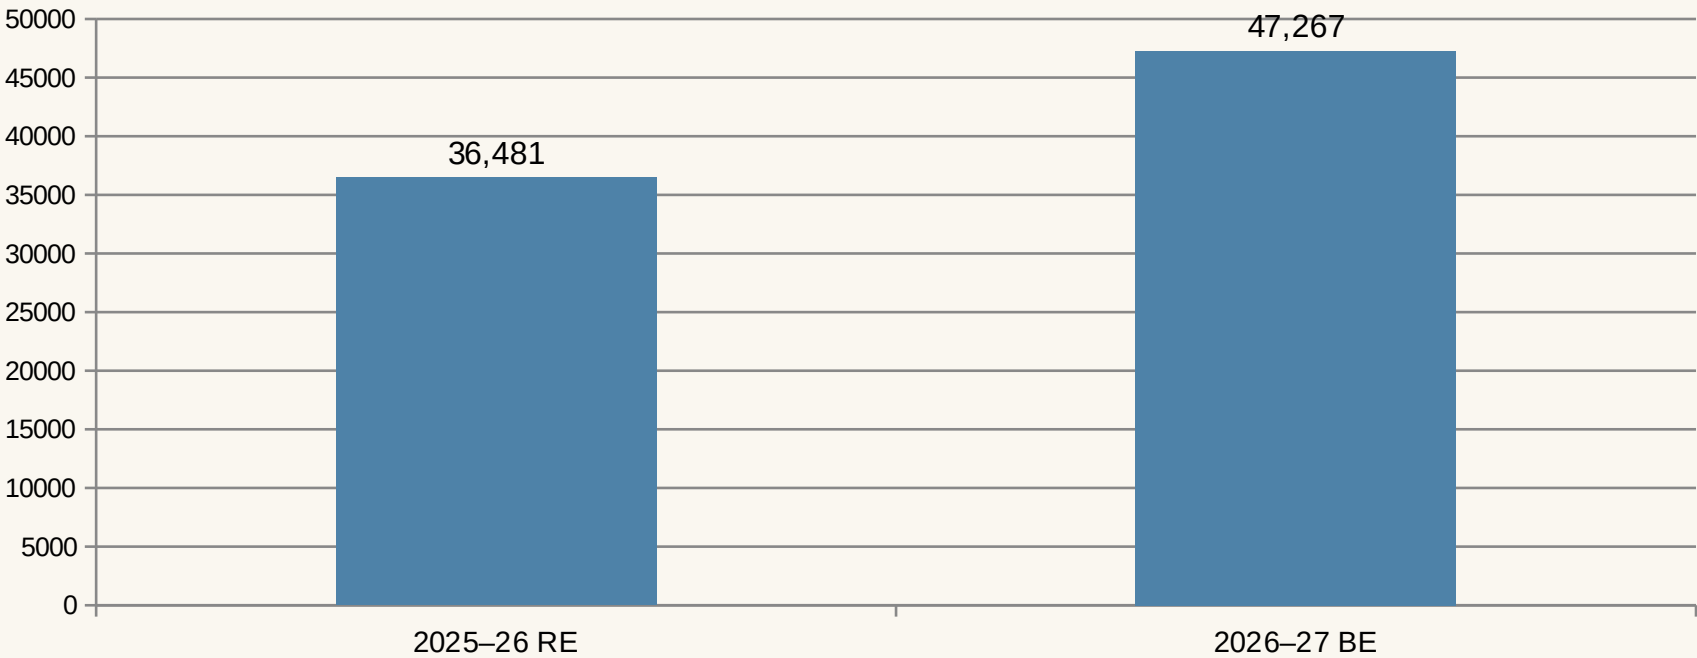

No measured improvement in flooding, lake health, wastewater treatment or response time is asserted.

State budget expansion highlights the gap between provision and delivery evidence

Telangana's state capital expenditure is budgeted at ₹47,267.28 crore for 2026-27 versus ₹36,480.87 crore revised estimate for 2025-26.

Telangana state capital expenditure - ₹crore

Statewide budgets, nominal RE-to-BE comparison; not Hyderabad actual spending or guaranteed delivery.

Musi restoration has documented objectives and still requires delivery evidence

The government budget provides ₹1,500 crore for Musi development, while the agency describes restoration goals and officials acknowledge relocation concerns.

Documented Agency vision; ₹1,500 crore BE; March conference	Needs proof Awards, disbursement, sewage and water-quality results	Human impact Compensation, location of rehousing and livelihood access
---	--	--

Funding provision and expressed objectives do not demonstrate awards, resettlement outcomes or restored water quality.

HYDRAA's formal remit does not decide the legality or outcomes of individual cases

HYDRAA's public-asset and disaster-management mandate cannot by itself establish the legal status or real-world results of an individual action.

Record	Process	Outcome
Official site and boundary documentation	Notice, authority, hearing or review record	Restoration, affected livelihoods and remedy evidence

Case-specific notice, title, adjudication and remedial records require independent examination.

The strongest research priorities concern boundaries, delivery and outcomes

The evidence supports sequencing document-backed questions ahead of claims about unmeasured public outcomes.

01 **Boundary crosswalk**

Use dated GO 55 municipal divisions and authoritative GIS only

02 **Electoral integrity**

Separate official ballot results, dates and constituencies

03 **Delivery tracking**

Distinguish budget, release, procurement and service evidence

04 **Accountability**

Link each issue to legal authority and measurable outcomes

Analyst-designed research priority order, not an empirical score or a party strategy.

IIM Shillong and applied policy modelling offer a research-oriented foundation

MBA, IIM Shillong (2023–25); candidate-reported Meghalaya PDS modelling with 4,500+ government records.

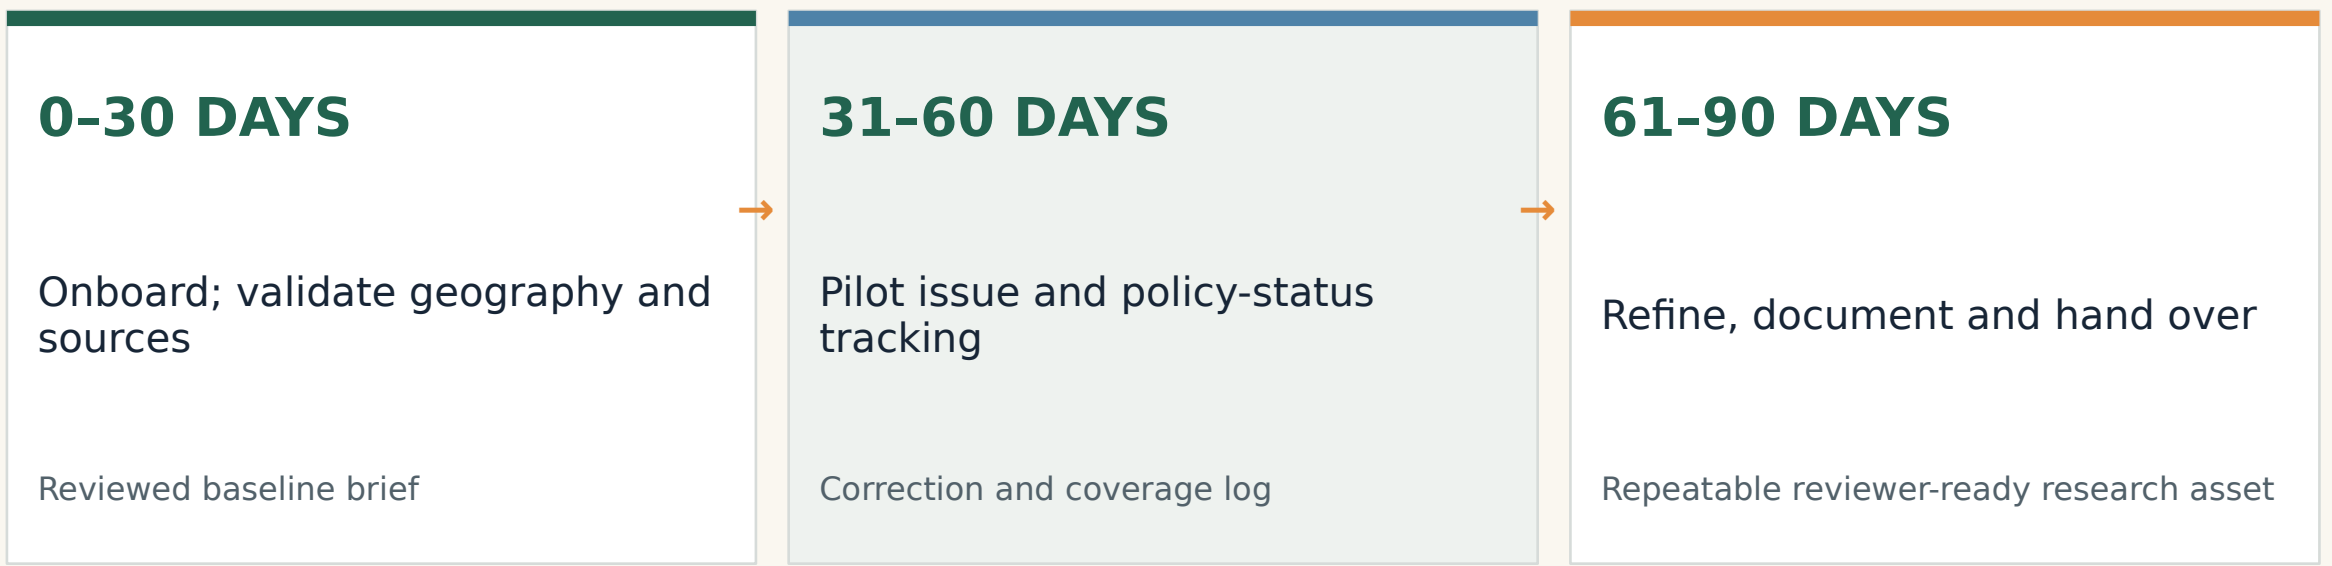

Proposed: reproducible public-policy analysis with a documented data-quality and source register.

Candidate self-report. Academic/project achievements are not independently audited.

My strategy and political-intelligence experience supports a testable delivery plan

Consultant, Marketing and Strategy, Nation With Namu (May 2025–Apr 2026). Resume reports an evidence-review workflow for seven political-intelligence team members.

A conditional 30/60/90-day plan; outputs depend on role scope, authorised access and supervisory review.

Self-reported experience. Timing and impact are proposals, not guaranteed outcomes.

THANK YOU

I welcome a discussion of the evidence and the research work I can contribute.
